DETAILED ACTION

Applicant has amended the claims 1, 16, and 42 to over the prior art rejection and the argument in the response to claim 28 of the non-final rejection is persuasive and the rejection of previous office action is withdrawn. Claims 1-13, 16-20, 22-40, 42-44, and 47-62 are allowed.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or suggest either in singularly or in combination the following limitations and other elements in the claims:

References Ishikawa et al. (US 5,977,565), Tanizawa (US 6,838,705), and Watanabe et al. (US 6,121,635) do not disclose:

- the electrode contact layer has a composition of $\text{In}_x\text{Ga}_{1-x}\text{As}$ at the junction interface with the ITO electrode layer;
- the electrode contact layer has an In concentration profile decreases as receding from the ITO electrode;
- the Al-based insulating layer is formed over the entire portion of the non-formation region;
- the phosphorus-containing compound semiconductor layer configured as a phosphorus-blocking layer having a bandgap energy larger than the contact layer.

Therefore, the above references do not disclose the claimed invention of present application and claims 1-13, 16-20, 22-40, 42-44, 47-62, and 65-66 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
